Full-stack web developer student with background in general business seeking to gain experience in field. Recently earned a certificate of completion in full stack web development from the Rutgers's Coding Bootcamp, with newly developed skills in JavaScript, CSS, Node.js, and responsive web design. Known for good communication and determination, with an intense focus on developing impactful, user-friendly applications and software. Takes great pride in work and enjoys working with a team setting. Developed "The Brokers" webpage that allows prospective investors to have the best search tools readily available to make their own informed stock investment decisions. Excited to leverage skills as part of an intense, quality driven team to build applications that pushes toward a brighter tomorrow.

TECHNICAL SKILLS

Languages: JavaScript ES6+, CSS3, HTML5, SQL

Applications: GitHub, MySQL

Tools: Express.js, Node.js, Bootstrap, Materialize, Animate.js

EXPERIENCE

Office Assistant. Laboratory Sales & Service

March 2020--September 2020

Acquired useful office experience, along with a better understanding of inventory management and customer/vendor relationships.

Key tasks:

- Handled phone calls with both vendors and customers creating good rapport with both.
- Responsible for inventory management in-warehouse, along with receiving and shipping. Assisted with “inventory day” by taking count of every product and coordinating with other employees with counts.
- Manufactured filter paper products for purification of scientific samples.
- Assisted with general office tasks, which include running credit cards, running backorder reports, creating invoices, and filing.

EDUCATION

Certificate, Full Stack Web Development – Rutgers Coding Bootcamp

New Brunswick, NJ
